## **PROJECTS**

## **Digital Clock**

June 2023 - July 2023

- · Digital clock application built using HTML, CSS, and JavaScript. It displays the current time in a 24-hour format.
- · Displays the current time in hours, minutes, and seconds.
- · Updates the time automatically every second.

## Weather Web-app

January 2023 - February 2023

- The weather forecast project you have created using HTML, CSS, and JavaScript is a web application that allows users to obtain up-to-date weather information for their location or any other city in the world.
- · The application uses an API to fetch weather data from a remote server and display it on the web page.
- The application includes a search bar that allows users to enter the name of a city and retrieve weather data for that location. When the user submits the search query, the application sends an API request to the server, which returns the current weather data for the specified city.

## **EDUCATION**

## **Bachelor of Technology**

Babu Banarasi Das Institute of Technology & Management  $\cdot$  Lucknow  $\cdot$  2025

## **CERTIFICATIONS**

## **Google Cloud Career Practitioners**

Babu Banarasi Das Institute of Technology & Management • 2023 Certificate for Google Cloud Career Practitioners Pathway Completion

## **COURSEWORK**

## **Operating System**

Babu Banarasi Das Institute of Technology & Management • 2023

#### Microprocessor

Babu Banarasi Das Institute of Technology & Management • 2023

## Python

Babu Banarasi Das Institute of Technology & Management • 2023

## **Computer System Security**

Babu Banarasi Das Institute of Technology & Management • 2022

#### **Computer Organization and Architecture**

Babu Banarasi Das Institute of Technology & Management · 2022

## Data Structure in C Language

Babu Banarasi Das Institute of Technology & Management · 2022 · C language

## **SKILLS**

Front-end: HTML, CSS, JAVASCRIPT

Programming Language: C/C++, Python

Backend: Node js
